

Former flexible tube with separated hoses

New flexible tube with integrated hoses

## Get your promotional advantage now on the new Gregomatic flexible tubes.

The former fresh and soiled water hoses assembly has been optimized.

On the new configuration, both hoses are welded, which clearly improves both handling and safety.

**ATTENTION:** the new flexible tube length is 5 m – this length is considered as ideal by professionals in their daily work. Of course, you may still connect several flexible tubes in order to increase your action radius.

As an owner of a old generation Gregomatic Vacuum-Washing System, you enjoy a **20% discount** on the purchase of a maximum of four new generation tube units, at a promotional price of CHF 182 / EUR 174 per unit (subject to price adjustments due to exchange rate variations). Those prices do not include packaging, transportation nor VAT.

Take advantage of this promotion now and send us your order via e-mail or fax. You will receive the new Gregomatic flexible tube(s) within a few days.
